

ATTENTION PORT WINE STAIN PATIENTS

The Department of Dermatology at the University of California, Irvine is conducting a research study evaluating the use of an investigational treatment for port wine stains.

Study Title: Novel Treatment for Port Wine Stain Birthmarks

Lead Researcher: Kristen Kelly, M.D.

We need research participants who:

- Are 18 years or older
- Diagnosed with Port Wine Stain not on the face

If you decide to be in this study and the study doctor says you can be in the study:

- You will be in this study for approximately 8 hours over the next 3 months
- This study involves six visits (one treatment visit and five follow-up visits after treatment).
- You will receive treatment that involves photodynamic therapy (medication given intravenously and light) in addition to pulsed dye laser (the standard of care treatment in the United States).
- You may be compensated up to \$500.

Qualified research participants will receive:

- Examination by Dr. Kristen Kelly
- Study related examinations and investigational treatment at no-charge

– If you are interested, please call today to find out more –
