## **Expanded Access Research Study of Epidiolex for Seizures in Sturge-Weber syndrome (IRB00029264)**

Principal Investigator: Anne M. Comi, MD

Contact: 443-923-9127

[comi@kennedykrieger.org](mailto:comi@kennedykrieger.org)

This small research study is sponsored by the Faneca 66 Foundation. It will look at the safety of the study drug Cannabidiol in subjects with Sturge-Weber syndrome and severe seizures.

Subjects must be **between 1 month old and 30 years old**. They must have Sturge-Weber syndrome **brain involvement**. They must be patients of Dr. Comi and have seizures despite being on two or more seizure medications.

Subjects will receive study drug to determine the effect on seizures and any side effects.
